

IT-Pro A lightweight ERP

IT-Pro is a light-weight yet highly sophisticated and feature rich modular application that allows simplified and comprehensive management of all major Enterprise functions under one umbrella. The system provides up to the minute reliable information allowing management to better control, monitor and fine tune all processes, as well as make crucial and timely decisions. An impressive array of built-in reporting and business intelligence resources reduce the probability of inaccurate speculation, human errors and wasted resources. With a host of user friendly tools, business operation management has never been easier. All these factors synergistically combine to generate quality in product, profitability and peace of mind!

IT-Pro offers a flexible modular design which may be implemented individually or as a complete system. Following modules are part of IT-Pro:

IT-Pro is available in two editions, pick the one which suits your needs:

Professional Edition contains feature-rich modules including complete Accounting, Purchase and Inventory, Sales and Security modules. Each module incorporates comprehensive reports needed on a day to day and periodic basis.

Enterprise Edition is an extended version of IT-Pro incorporating complete Human Resource module along with extensive reports. This edition is intended for large companies and fulfills their need of efficiently managing staff related processes.

Fundamental Features:

Industry Expertise

Supports the real-world processes you employ every day. These advantages add up to a faster and greater return on investment and that makes IT-Pro a wise investment for your company's future.

Adaptability

Allows easy customization of features and functions and helps you cope with constant change.

Reporting

Simple yet powerful reports bring the data at your fingertips.

Ease of Implementation

Helps you get up and running sooner.

Data Migration

Data migration from legacy system to IT-Pro is also done upon request.

Seamless Integration

Removes the barriers that stand between people, systems, and information.

Post Deployment Support

IT-Pro is backed by qualified staff for technical support. This provides confidence in software and continuity in business.

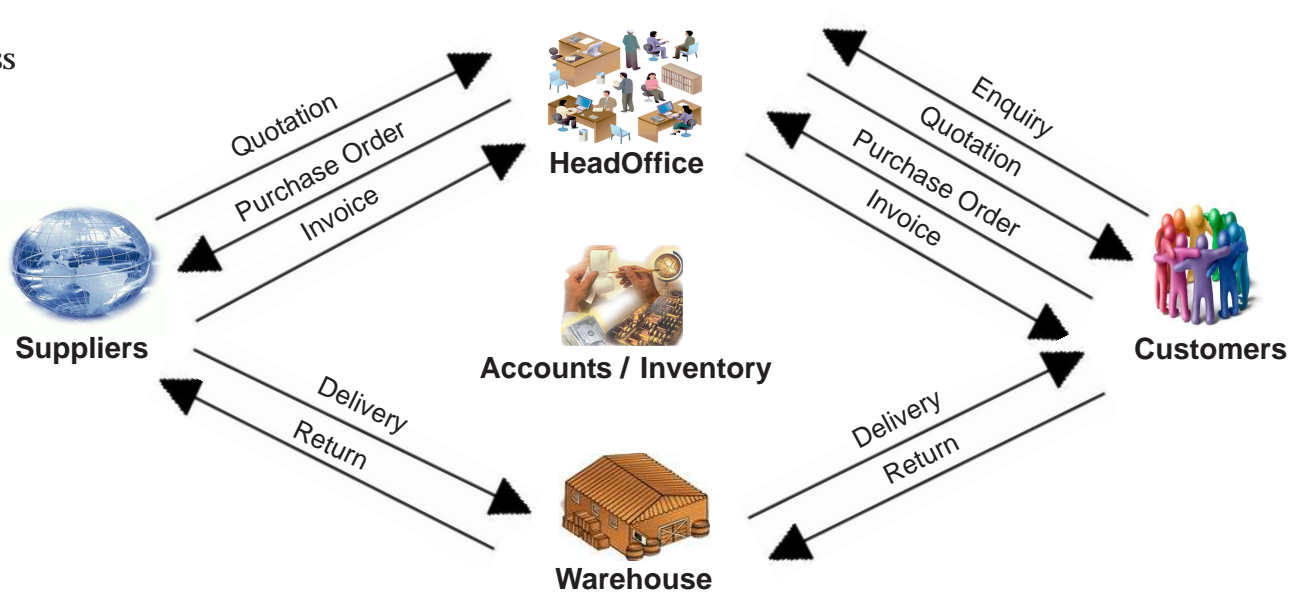

Scalability

Accommodates virtually unlimited growth.

Lower Total Cost of Ownership

Helps minimize long-term costs.

The Process
